

Pilot Bank's Successful Integration of Goldleaf's Merchant Capture

Laura Blackwell, First Vice President & Director of Marketing at Pilot Bank, is pleased with the positive experiences Pilot Bank and its customers are having with the Merchant Capture remote deposit solution. "We were pleasantly surprised to find that Merchant Capture not only provides a convenience for customers outside our geographic footprint, but we have customers only two blocks away from our bank using it. Health care providers are benefiting from the time and costs it saves, and a nearby software company uses it to complement its commitment to automated technology processes. A leading Tampa preschool with six locations is thrilled with the cost savings of consolidating the deposit process to one location. Both our customers and back office people love Merchant Capture," states Laura.

Established in 1987, Pilot Bank is a \$234M community bank with seven locations in the Tampa, Florida area. "The Can-Do Bank" offers personal and commercial banking services including online banking; investment and insurance services; consumer, mortgage and commercial lending; and specialized customer services such as health savings accounts, community service checking accounts and free coin counting machines at each location.
